FORMOTION®

ForMotion™ apparel is three-dimensionally engineered to move naturally with the athlete's body during sport. Realizing the shortcomings of traditional two-dimensional apparel, adidas created ForMotion™ to follow every curve of the athlete's body and mimic the natural movement of sport for a better fit and greater comfort while in motion. Its sport-specific fabrics also feature extreme stretch zones that allow the pre-shaped garment to move naturally with the body even during the most strenuous of athletic activities.
